ERDF International Competitiveness Grant Scheme

In order to obtain assistance in the setting up of this export department, AIS has sought and obtained funding through the EU's **European regional development fund (ERDF) under the International Competitiveness Grant Scheme.**

AIS Ltd. is considered by many as local market leaders in our specialized engineering fields.

We now intend to start up an export department in order to offer our services to customers in Europe and North Africa by setting up a sales export department in order to market and sell our Building management systems and SCADA systems.

AIS will also be starting up operations in North Africa, in particular in Libya, where the market for our products and services is expected to be very promising.

The principal aims of this department will be to develop new international business opportunities and follow them through to completion.

The contract which will regulate this scheme was signed between Malta Enterprise and AIS in June 2009.
